

Release Notes

OS Build 20043

For Mesa 2 Rugged Tablets Running the Windows 10 Pro Operating System

These notes include important information for our Mesa 2 customers regarding the most recent release of the Windows 10 Pro operating system and a related patch.

Documentation and software updates are located on our website here: <https://www.junipersys.com/support>. To install the patch, select Mesa 2, then Downloads.

Updates and Resolved Issues in the OS Cumulative Patch

- Fixed a bug in the patch installer where one exe was not getting stopped, which caused an extra reboot.
- Fixed a bug in the patch installer where one component was not getting updated.
- Updates the keypad driver, background helper exe, and control panel to add Brightness Up/Down programmable options.
- Updated the expansion driver to guard against improper IOCTL usage.
- Updated the touchscreen profiles on some types of displays.
- If the currently running profile is out of date, the touchscreen profiles app is launched to prompt the user to update the touchscreen profile.

Updates and Resolved Issues Contained in the OS for new Devices

- Updated the keypad driver, background helper exe, and control panel to add Brightness Up/Down programmable options.
- Updated the expansion driver to guard against improper IOCTL usage.
- Updated touchscreen profiles on some types of displays.
- Updated the graphics driver (OS only). If you are installing the patch and want to update the graphic driver, it is located here: <https://downloadcenter.intel.com/product/96552/Intel-HD-Graphics-505>.
